

KRYPHOS

Cyber Asset Intelligence & Attack Surface Management Platform

Document Type	Security Assessment Report
Target	wordpress.com
Assessment Type	External Reconnaissance
Generated	2026-06-30 19:28:23.167728
Classification	Confidential

1. Executive Summary

Kryphos performed automated external reconnaissance against **wordpress.com**. The assessment identified:

- Subdomains discovered: 10
- Open ports identified: 2
- Technologies detected: 4
- Security findings: 1

Overall Risk Rating: **MEDIUM**

2. Target Information

Domain	wordpress.com
Framework	Kryphos
Methodology	Black Box Reconnaissance

3. Attack Surface Discovery

No	Subdomain
1	www.wordpress.com
2	mail.wordpress.com
3	ftp.wordpress.com
4	blog.wordpress.com
5	api.wordpress.com
6	dev.wordpress.com
7	test.wordpress.com
8	admin.wordpress.com
9	portal.wordpress.com
10	vpn.wordpress.com

4. Network Exposure Analysis

Port	Service	Status
80	HTTP	Open
443	HTTPS	Open

5. Technology Fingerprinting

- Bootstrap
- Nginx
- React/Next.js
- WordPress

6. Security Findings

Finding ID: KRY-001
Severity: Medium

Issue: Content-Security-Policy Missing

Recommendation: Review and implement appropriate security controls.

7. Conclusion

Kryphos successfully completed attack surface discovery and identified security observations. The findings should be reviewed and remediated according to organizational security policies.
